

Latest Emerging Threats in Digital Privacy 2026

Protecting yourself from 2026 digital threats

- 1 Deploy AI-detection anti-phishing tools like Avanan or Vade immediately.
- 2 Enable two-factor authentication on all accounts today.
- 3 Replace biometric-only logins with Yubikey offline authentication (\$50).
- 4 Subscribe to automated data removal service like Incogni (\$13.99/month).
- 5 Set quarterly calendar reminders to run new data broker removals.
- 6 Change all smart device default passwords and segment home Wi-Fi.
- 7 Switch to Home Assistant or local-only smart hub alternatives.
- 8 Revoke location permissions from apps in your phone settings.
- 9 Use privacy-focused browser Firefox or Brave for daily browsing.
- 10 Install encrypted messaging app Signal for sensitive communications.
- 11 Purchase Faraday sleeve (\$29) if stalking or tracking is concerned.
