

Ai Business Operating System

Implementing an AI business operating system

- 1 Track every repetitive task you perform for one week.
- 2 Identify tasks taking over 5 hours weekly and mark for automation.
- 3 Audit your current AI tool spend for unused subscriptions.
- 4 Map your 5 most repetitive business processes in writing.
- 5 Select one unified AI BOS platform instead of multiple tools.
- 6 Document standard operating procedures before automating any workflow.
- 7 Replace each repetitive process with a modular AI workflow.
- 8 Connect your CRM, inbox, marketing, and analytics into one dashboard.
- 9 Test your AI BOS integration across all business functions.
- 10 Track admin time saved weekly to measure efficiency gains.
- 11 Eliminate tab-switching by consolidating tools into your chosen BOS.
